

Automatic Disc Loader for Record Cleaning Machine

(Record cleaning machine is not included.)

Klaudio's disc loader queues up to five records for automatic cleaning and drying. Each LP is lowered and raised with a motorized arm, and its status is displayed by an LED (red=dirty, green=clean). Records can be exchanged continuously, so there's no need to wait for all five discs to finish. The auto-loader will track the cleaning status and location of newly added discs.

The automatic loader installs easily onto Klaudio's ultrasonic cleaners using the included thumb screw and auxiliary power cable.

Note: This product is not compatible with Klaudio's standard size Silencer Case.
