Freestanding Laser Base for Klaudio Tonearms

Freestanding laser base for Klaudio Tangential Tonearms. The laser module is not included with this product. This is an alternative installation option to mounting the laser on the turntable. The base is positioned near the turntable.

The laser base height can be adjusted between 2.4-7.9 inches (61-201mm) using the included pieces. The laser included with the tonearm has additional fine-tuning of height up to 1 inch (26mm), plus angle adjustment. Primary materials are solid brass and POM acetal, with a total base stand weight of 12.1 lbs (9.6kg).
